Gunner Rock

Jacksons Hill St Marys Isles of Scilly

## DESCRIPTION AND LOCATION

Gunner Rock was built in 1973 and occupies a position almost at the head of a quiet cul de sac on the eastern side of Hugh Town. The fourteen houses which make up Jackson's Hill are all large and detached, and have mostly been designed to suit the original sloping hillside site and to take advantage of the sea and island views where possible. Gunner Rock has sea views from the lounge and some of its bedrooms.

Originally constructed over three floors, within recent years the current owners have spent a considerable amount of money on redesign and refurbishing the property to provide a totally self-contained apartment on the lower ground floor, whilst retaining a spacious three bedroom residence on the ground and first floor. This therefore provides a most useful and easily managed income from the apartment, whilst retaining the option of further income from bed & breakfast accommodation within the main residence.

The design is such that the two parts of the house are entirely self contained, including separate accesses, and both have a pleasant garden area. Included in the refurbishment was replacement uPVC double glazing to all external windows and doors, and tasteful and expensive internal fittings including hardwood doors etc.

## ACCOMMODATION

Dimensions are approximate. The condition and operation of appliances or services referred to have not been tested by Sibleys Island Homes and should be checked by prospective purchasers.

From the roadway, a flight of stone steps leads down onto a concrete terrace, the property is then approached through a UPVC Georgian style panelled front door with double glazed UPVC side screens into:
